

# Energy Weather Conference

## Energy Weather Conference 2015, 22./23. September 2015

We would like to thank all of our participants and speakers for a great conference with very interesting presentations and active discussions!

The third Energy Weather Conference once again served as an exchange platform of practice-oriented knowledge for the energy and meteorology sectors. Participants and speakers represented among others: TSOs, trading houses, gas- and electricity suppliers, research facilities and European weather services (private and public).

A variety of practice-oriented topics on grid operation, trading, as well as the generation and storage of renewable energies were discussed. The presentations were held by top speakers from the following companies and institutions:

**50Hertz Transmissions   ABB   ConWX   Deutscher Wetterdienst   energate Gasmarkt**  
**Energy Weather   E.ON Global Commodities   EuroWind   FfE**  
**Gasversorgung Süddeutschland   Powel AS   Repower AG**  
**Varta Storage   Vattenfall   ZSW**

## Impressions and Media Coverage of the last Energy Weather Conferences
